Making University STEM Environments More Inclusive for LGBTQ+ Individuals

Dr. Sara Brownell & Dr. Katelyn Cooper

October 13 at 12:30PM-2PM at San Carlos

Science and engineering disciplines have been considered unwelcoming spaces for LGBTQ+ individuals and LGBTQ+ students are less likely to persist in STEM majors compared to their straight and cis peers. In this talk, I will discuss how we can work to create more inclusive academic environments for LGBTQ+ individuals by sharing the results of multiple studies.

Sara Brownell is a Professor in the ASU School of Life Sciences. Katelyn Cooper is an Assistant Professor in the ASU School of Life Science
