

# SABER SEMINAR SERIES

## SPRING 2023

### Form & Function: Drawing to Learn Biology

**Thursday**  
**Jan. 19th, 2023**

**9 am PT, 10 am MT,**  
**11 am CT, 12 ET**

## Jennifer Landin

 **NC State University**  **jmlandin@ncsu.edu**

The classroom use of drawing activities helps students to observe structures more closely, ask reflective questions, and process content for better understanding and recall. Jennifer Landin will present her unique approach to teaching biodiversity and comparative anatomy through biological illustration. She'll also offer options for everyone to incorporate drawing activities into their classes, even for large-scale, fast-paced courses.
